I don't want juice, I want mizumo!

Mizumo is a brand specialized in designing, manufacturing and marketing automatic orange juicers for freshly-squeezed juice.

We are committed to delivering high quality, high performance professional juicers that remain true to the key features of our products: simple, strong and affordable. We also seek to set them apart with an attractive, discreet and sophisticated design suited to all types of premises and businesses.

Design and integration capacity

Our team of professionals combines youth and experience, which, backed by strategically defined infrastructures and resources, gives the response capacity to effectively address customer needs.

After-sales, quality and R&D

Our ongoing market and product research efforts are aimed at adapting to today's demands while ensuring the highest efficiency at all times.

Mizumo Quality Control

Environmentally committed

Cleaning and Desinfection Mizumo Program

Mizumo Smart Technology

NATURALLY MIZUMO

The story of excellent juice always begins on the tree, under the gentle sun and the rain that waters it. All thanks to the growers, constantly pampering and never neglecting their trees.

For this reason, every orange squeezed by Mizumo has a little bit of sun, a little story of its own and a lot of hope. We handle the product respectfully and in the knowledge we are doing our bit by producing a natural, healthy and tasty drink.

As a result, our juicers preserve all the original : **natural and healthy**, qualities of the oranges, cutting them one by one and squeezing out every last drop without having to handle the fruit.

MIZUMO GEN Z

- Z-shaped bin design inspired by generation Z
- Designed by and for Generation Z
- Chosen for Generation Z

The new design of our juicers is inspired by Generation Z, who are poised to shape the world and guide the trends to follow. To reflect this in our juicers, we have designed Z-shaped bins, as a departure from the usual style.

They were designed by and for a modern generation that inspires us and drives us to evolve in the styling and development of our machines, adapting ourselves to change so as to offer the latest innovations.

MIZUMO SMART TECHNOLOGY

Our entire range of juicers can be fitted with a connectivity module, turning them into digital 4.0 devices with all the capabilities of the Internet of Things (IoT).

This technology provides real-time information on the status of your machine, using cloud storage for the historical data on consumption dates, location, peak demand times, etc.
